REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

3 JAN 1911

Kept at Baldock

in the County of Herts 4

by F. Langston Day

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 214 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Baldock.
Distance 500 yds Direction NNE.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

Kept at Barnet

in the County of Herts

by Rev. J. B. Lee

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 4 in.
" " " Sea Level 350 ft.

Time of Observation 9 a.m.

Nearest Railway Station: Name High Barnet
Distance 300 yds Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Dear Sir

I have just heard that there were some mistakes in the account of the rainfall here which was sent to Mr Hopkinson for the Herts Natural History Society; & in case that the return sent to you was similarly at fault, I send a correct return for those months which were wrong on opposite page.

Yours faithfully E. A. Parker

FORM A.
BRITISH RAINFALL.

28 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Bennington House

in the County of Hertfordshire

3

by Rev. Dr J. D. Parker

Rain Gauge: Pattern ....
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation ....

Nearest Railway Station: Name ....
Distance .... Direction ....

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL. 4 JAN 1910

Kept at The Lordship Bennington

in the County of Herts

by A. F. Bott

Rain Gauge
Pattern
Diameter of top 5" in.
Height of top above Ground ft. 10 in.
" " " Sea Level 365 ft.

Time of Observation 9 AM.

Nearest Railway Station
Name Knebworth
Distance 3¾ miles Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Berkhamsted

in the County of Hertfordshire 2

by E Mawley Esq

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 401 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

2 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Little Callipers Chipperfield

in the County of Herts 2

by A. W. Rivington

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 407 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Kings Langley
Distance 3 miles Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

Kept at Aldenham House

in the County of Hertfordshire

by Edwin Beckett

RAIN GAUGE
Pattern
Diameter of top 10 in.
Height of top above Ground 4 ft. 9 in.
" " " Sea Level 305 ft.

Time of Observation 9 am

Nearest Railway Station
Name Elstree
Distance 2 mile Direction S E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.
28 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at *Gilston Park*

in the County of *Hertfordshire* 3

by *Mr E. Leach*

Rain Gauge:
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 175 ft.

Time of Observation

Nearest Railway Station: Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

5 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Hatfield St Mary's Vicarage Newgate St

in the County of Hertford 3 (Post town)

by Rev. H. W. Southey (Vicar)

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 355 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Cuffley G.N.R
Distance 3m Direction S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A.
BRITISH RAINFALL.
28 JAN 1911

Kept at Hertford

in the County of Hertfordshire 3

by N. W. B.

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 120 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL. 18 JAN 1910

Kept at The Laburnums, Preston

in the County of Hertford

by R. de V. Pryor

RAIN GAUGE
Pattern round
Diameter of top 8 in.
Height of top above Ground 2 ft. 6 in.
" " " Sea Level 484 ft.

Time of Observation 9. a. m.

Nearest Railway Station
Name Hitchin
Distance 3¾ m Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

10 JAN 1911

3

Keptr at The Laburnums, Preston, Hitchin

in the County of Herts

by R Leo Pryor

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 2 ft. 6 in.
" " " Sea Level 480 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Hitchin
Distance 3¾m Direction N. N. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Form A2.
British Rainfall.

14 JAN 1910

Kept at The Chilterns Hitchin
in the County of Herts Excd KMJ
by F. Ransom

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 300 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Hitchin
Distance ½ m. Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1908.

FORM A2.
BRITISH RAINFALL.
18 APR 1912

Kept at Potters Bar (Barvin).

in the County of Hertford

by W. E. Balston

RAIN GAUGE: Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " " Sea Level .... ft.

Time of Observation 9 a.m.

Nearest Railway Station: Name
Distance .... Direction ....

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM 12.
BRITISH RAINFALL.
936

Kept at Rothamsted Expt Station
in the County of Hertford
by The Lawes Agricl Trust.

RAIN GAUGE
Pattern
~~Diameter of top~~ in. Area 1/1000th acre
Height of top above Ground 0 ft. 9 in.
" " " Sea Level 420 ft.

Time of Observation 9 am

Nearest Railway Station
Name Harpenden
Distance 3/4 mile Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

2 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Roxley Court, Willian.

in the County of Herts. 4

by Mrs. Bendixson.

Rain Gauge: Pattern Snowdon rain gauge

Diameter of top 5 in.

Height of top above Ground 1 ft. 6 in.

" " " Sea Level 370 ft.

Time of Observation 9.30

Nearest Railway Station: Name Hitchin

Distance 3½ Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

10 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Earls Hill House

in the County of Hertfordshire

by John Phillips

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 6 in.
„ „ „ Sea Level 225 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Royston
Distance 2 mile Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

7 MAR 1911

Kept at Bone Hill St Albans

in the County of Hertfordshire 2

by H. J. T. Broadwood

Herts Nat. History Soc.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 336 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
10 JAN 1910

Kept at Herts County Museum

in the County of Hertford

by (Caretaker, for) John Hopkinson

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 389 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name as before
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

6,000. V. '09.

9 JAN 1911

I am not sure that I have ever explained why you nearly always get my letters on a Monday morning. They are nearly always posted on a Saturday as I get the 'Herts Advertiser' on that morning (occasionally on Friday night) and get the results at St. Albans from that, my deputy supplying the return to the paper every Thursday. Sometimes the paper does not suffice as when I suspect an error or when the figures are so badly printed that I cannot read them. I have always to wait until a month has closed ~~on~~ by the previous Wednesday.

I have sent four of our Herts observers' rainfall returns back for correction and have two more to go back today. One observer made seven mistakes, additions to totals in four months wrong, and days of rain wrong in three months.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Dear Dr. Mill,

I have pleasure in sending herewith my first year's rainfall record.

As my records before March 1st were not complete Mr. Stewart-King has kindly given me his figures for Jan. & Feb. in order to complete the year.

On Dec. 23rd I purchased from Negretti a Camden pattern measuring glass. On comparing this with my old glass, whose maker I do not know, I found that the old one read higher than the Camden pattern.

I thought probably the latter was correct though I had not obtained a certificate with it. I should have been in some doubt however but having a new 100 c.c. measure I have checked some of the readings of the Camden glass with this & find that they agree very closely.

I therefore assume that my original figures up to Dec. 23rd were slightly too.

high & in the records which I send I have made an allowance for this.

I enclose herewith subscription for Symon's Magazine.

I am
Yours truly
W. H. Newman

Ex DL

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

5 JAN 1910

Kept at West Lodge, Totteridge

in the County of Hertford

by W. H. Newman.

RAIN GAUGE
Pattern Ordinary copper without snow rim
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 390 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Totteridge
Distance 2m. Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by J. Hopkinson Esq

Rain Gauge:
Pattern
Diameter of top in.
Height of top above Ground ft. in.
„ „ „ Sea Level ft.

Time of Observation

Nearest Railway Station: Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

2 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Bridge House, Welwyn

in the County of Hertfordshire 3

by B. Wilfrid Thomas

RAIN GAUGE: Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation

Nearest Railway Station: Name Welwyn
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
